

## What Leeds City College said:

“

As a College, we were looking to reduce our recruitment spend but increase our direct applications to the business. We looked at a number of systems but decided on networkx as they were able to provide us with a complete end to end, paperless recruitment process.

We have improved the candidate experience, through the easy to use system. The system also automatically removes the equal opps information and provides an ID number for all candidates which had to be done manually before (this also provides us with Management Information reporting tools - another timesaver for the team). The system has also improved the control and visibility of all recruitment activity for the team.

Our Panel members can now screen applications online which saves them time (and means application forms no longer needed to be printed - saving us further costs).

As a business, we would recommend networkx to other Colleges and Universities looking to reduce their recruitment spend with a fully integrated recruitment portal (it can also data extract the information to your HR system).

networkx regularly upgrade the system and provide us with good support as and when we need it.

”
